

In order to share your views and experience with other CPACE stakeholders, please reply to the questions below.

Thank you very much for your cooperation.

April 2024,
The ECPC CEO

- Why the choice for CPACE?

The choice was obvious for us, as we needed a standard that is independent from players that charge for the usage of such an instrument. Therefore, our scheme cooperated with other scheme managers in order to set up the CPACE ecosystem.

- In which markets have you deployed CPACE compatible cards and/or terminals?

We have deployed CPACE compatible terminals in Portugal (100% of the MB available network), as well as issued cards, both single branded and co-branded. CPACE payments can also be made with mobile phones or wearables.

- What would be the next steps in the CPACE ecosystem that you would value?

We appreciate what has already been done by all the CPACE stakeholders in order to increase its footprint. We welcome this continuous work, as well as the constant functional improvements that will surely continue to be released.

Name : Jorge Coreia
